TECHNOLOGY SKILLS

Systems Development Life Cycle, PHP, MySQL PostgreSQL, Oracle DB, Java, JSP, JSTL, Json, Flutter, JavaFX, Procedural C, C++, C#, Twig, Volt, CSS 2, HTML4, HTML5, PHP CMS, MVC Frameworks, CSS 3, UML, Dart, Database Design and implementation, GIT version control, Android and iOS development, RESTful APIs, SignalR API, MVVM Architectural pattern, Kotlin, .NET Core, XAML, Xamarin Forms, Blazor Web Assembly, Spring Framework, SOLID Principles, WordPress plugins, libGdx, Unity, Swift, Azure App Services, ReactJS, NextJS, AWS Cloudwatch, AWS API Gateway, AWS Lambdas, Vite build tool, Threejs

WORK HISTORY

Keystroke Holdings – .NET Developer

September 2025 - current

Tools: IntelliJ Idea, Windsurf, Visual Studio Code with CoPilot, Visual Studio 2022, AWS Lambdas with .NET, Build and maintain lambdas for 51 Club as well as Bizagi OIG with Spring framework and Java. Monitor Cloudwatch logs, and setup API Gateway endpoints on AWS. Configure Azure pipelines with YAML for deployments to QA, UAT and Production environments. Build the easy-stickers pwa with ReactJS Frontend and SpringBoot backend.

SovTech Software Engineer

August 2024 – August 2025

Tools: IntelliJ, Spring Framework ranging from version 3.2.17 to Spring Boot, Postman, GoLang, AWS Lambda, GitLab, Jira

Upgrade many of the legacy Java applications to newer Java 21 for Payfast by Network. Netcash connector, Payhost connector, as well as develop and maintain Go applications.

Reason for leaving: Contract completed successfully

African Ideas Senior .NET Developer

February 2024 – July 2024

Tools: Visual Studio 2022, Azure DevOps Board, Postman, Blazor, FluentUI, Develop framework development stub for the WCG development team using Microsoft Orleans, .NET and various libraries that come with .NET. Azure App Services, Azure Pipelines. Work on the WCG eProcurement new solution, Procurement Planning Tool, Funding App for Tourism Department, AppIndicator, NodeJS, Angular.

Reason for leaving: Contract completed successfully

ByteOrbit Android Developer

April 2022 to December 2023

Tools: Android Studio, Figma, VS Code, Miro, SourceTree, GitLab, Java, XML, Jira, Flutter, React Native, Converting UI from Figma to the Shyft Android Native Application. Transferring api endpoints to function with the native Shyft application. Tickets are assigned in Jira with story points giving estimations, so mainly we work on these story points to complete new features. Notable features contributed are countries dropdown on the registration flow for Shyft users, modifying the Forex screen to allow users to buy/sell between active currencies and then also modifying Shyft to cater for additional exchanges currencies so that users can buy/sell shares on these screens. Work on Merge Requests for peers. Also work on bugs that are found on the Forex/Shares features in the Shyft app, Various apps using the flutter sdk, using external libraries like Retrofit and OkHttp to handle JSON payloads that should be translated to UI and functionality on Shyft Global Money App.

Reason for Leaving: Contract completed successfully

MegatonCities International January 2020 to March 2022

Tools: Microsoft Visual Studio, Windows Presentation Foundation, Xamarin, .NET Framework and .NET Core, Android Kotlin convert desktop app to mobile app, Android Java, RESTful API's, libgdx, Blazor Web Assembly, Spring Framework, Flutter, Angular 10, React Native, Maintain and resolve issues with InTouch@Work desktop application, build a weather detection app for Client in Namibia, Built Donlu Africa Music app for Donlu Africa Client in Namibia, Coin Dash counting game for a school in Namibia, Convert WPF app to PWA for Connect@Work using Blazor, built a hotel booking system using Spring Framework, Convert React Native app to Flutter

Reason for Leaving: Company went bankrupt

Click Cloud Hosting Solutions Software Engineer July 2018 – December 2019

Tools: Yii2 Framework, Laravel, Wordpress, WHMCS, Sage Accounting API, iOS Swift Development, Android Studio, MySQL, XCode, Eclipse IDE, Ubuntu 18, Postman Client, Flutter and Dart, Kotlin, Symfony Design, develop and implement applications as per company and client requirements, which includes database design and web application frontends and backends as well as web APIs that communicate with applications done for Android and iOS

Reason for Leaving: Received a better offer from MegatonCities

Urslamjam Systems Analyst and Software Developer January 2013 to April 2017

Tools: XenServer, Phalcon PHP, Symfony 2, UML, Twig, Volt, Android, Procedural C, Java, JavaScript, Java, Debian, Archlinux, Mac OSX, FreeBSD, FreeNAS, PostgreSQL, iOS, JavaFX, PhoneGap, Android Studio, XCode, Python and Django website Setting up and installing Network Attached Storage Servers using FreeNAS 8.1, Setting up and installing the various web servers, database servers and storage servers which include Apache2, Tomcat 8, Designing database schemas and implementing on PostgreSQL 9.2, Building and installing backend framework for media management, Constructing and maintain website frontends as well as backend engines to deliver content to various devices, build face2face and in house android applications running on Android TV. Lay foundation for urSlamChat android and iOS app built with Firebase realtime database.

Reason for Leaving: Family related

ImperatechPHP DeveloperSeptember 2012 to December 2012

Tools: Symfony, Doctrine, Twig and jQuery

Reason for Leaving: 3 month contract completed successfully

PROJECTS | WEBSITES

<https://delightful-tree-0d0f62303.5.azurestaticapps.net/>

- Blazor app running on Azure for Tourism and ECEP Funding

[WCG PLANNING TOOL \(westerncape.gov.za\)](http://wcgplanningtool.westerncape.gov.za)

- Angular frontend and .NET Core backend

<http://www.urconnex.com>

-Video Social Network built with NextJS, ExpressJS and ThreeJS, PHP legacy-api running on PostgreSQL

<http://connect-at-work.com.na>

- Intranet app for the company, built first with Angular and .NET Core then switched to Blazor Web Assembly and .NET Core from a WPF app.

<http://click.na>- Fixed frontend using smarty template engine, html, bootstrap and jQuery

Shyft Global Money App

<https://play.google.com/store/apps/details?id=za.co.globalwallet.globalwallet&hl=en&gl=US>

Shopping List app in Flutter/Firebase as a database

https://github.com/ldev22/shopping_list

Favourite Places app using Flutter/Google Maps SDK

https://github.com/ldev22/map_apps

Augmented Reality app

<https://urconnex.com/urconnexXr.apk> - made with Unity backend ExpressJS
